

Gulfstream Trainer 40% Club

The table below contains trainers who have compiled a 40% + winning average (at the past 3 meets) with a certain race factor or karma move. Most trainers only win at a 10% clip on average, so a 40% angle is something special. Keep in mind that a strong track bias or a horse that isn't fast enough can neutralize these high percentage trainer plays. Note that 40% trainer/jockey combinations are listed in the Jockey chapter. Other 40% club players are listed in the Hares and Tortoises tables on the next page.
